

Sponsored by the Friends of the Hunt River Watershed

River Restoration and Dam Removal

A presentation
by Rachel Calabro of
SAVE THE BAY

February 22, 2011

7pm at Cold Spring Community Center,
30 Beach Street, North Kingstown, RI

The Spring rains of 2010 were a statewide historic event that brought record high water to many places in the state. As a result of the high water on the Hunt River the Old Forge Road dam on the boarder of North Kingstown and Warwick was severely damaged. The North Kingstown Department of Public Works has hired an engineering firm to assess the damage and to estimate the cost of Repairing, Rebuilding or Removing the dam. This presentation is designed to educate the public on the issues of river restoration and dam removal. Become an informed public by attending this meeting sponsored by the Friends of the Hunt River Watershed. All are welcome.
