**Regulatory Analysis Summary and Supporting Documentation:**

The proposed amendments will create consistency between existing CRMC rules and long-standing practice in permit conditions that require permit extension requests at least 60 days in advance of permit expiration.

The proposed regulations do not impose any new requirements on regulated entities including any small businesses or any city or town; therefore, there is no adverse economic impact. In consideration of the alternatives the CRMC has determined that there is no alternative approach among the alternatives considered that would be as effective and less burdensome to affected private persons as another regulation based on available information. In addition, there are no other state regulations which are overlapped or duplicated by the proposed regulation. The CRMC has determined that the benefits of the proposed rule justify the costs of the proposed rule, and that the proposed rule will achieve the objectives of the authorizing statute in a more cost-effective manner and with greater net benefits than other regulatory alternatives.
