- Engagement with external stakeholders to develop and implement mitigation for the project.
- Support site investigations through the development of survey plan preparation and compliance during investigations.
- Responsible for the management and oversight of the project permitting team, project consultants, and subcontractors.

WSP USA, Inc. (formerly Ecology & Environment, Inc.)

Lancaster, New York

Project Manager

2014 – 2021

Chief Geologist

2017 - 2021

Senior Geologist

2014 – 2017

- Managed natural gas expansion, transportation, and transmission projects in New York throughout their life cycle, including roles as a Project Manager on a \$600 million transportation project and a \$30 million interstate natural gas expansion project with offshore components.
- Successfully executed a \$1.5 million offshore reef mitigation project with the New York State Department of Environmental Conservation.
- Ability to provide strategy development to clients and problem solve to aid in projects' path forward and obtain successful outcomes.
- Liaison between client project team leadership, government agencies, and public stakeholders.
- Responsible for preparation and delivery of federal and state permit applications.
- As environmental compliance manager oversaw the construction of an offshore pipeline project in the Northeast without incurring any delays due to environmental non-compliance.
- Responsible for the development of and environmental compliance training for all construction personnel. Included oversight of the water quality monitoring team, Protected Species Observers, and Environmental Inspectors during construction. Prepared and implemented a water quality monitoring plan to meet state requirements.
- Coordinated with agencies during construction to secure variances and permit modifications without significant delay.
- Ability to identify environmental risk during development and construction and problem solve solutions to facilitate successful project outcomes.

Geologist

2008 – 2014

Associate Geologist

2011 - 2014

Junior Geologist

2008 - 2011

- Lead author for permit applications, environmental analysis sections of Environmental Impact Statements, Environmental Assessments, and information requests.
- Supported investigations and remedial programs for pipeline facilities, wind energy farms, and sites containing hazardous materials and waste.
- Completed geologic and hydrologic evaluations to support the preparation of environmental assessments and authored corresponding reports.
- Interpreted the results of fieldwork, laboratory analysis, and computer modeling to delineate the nature and extent of surface and subsurface contamination to develop remedial measures.
- Prepared and implemented sampling plans for groundwater, surface water, soil, and sediment.
- Lead field teams conducting field investigations and contractor oversight.
- Evaluated environmental regulation and permit compliance for oil and gas facilities.

Director, Tiny Town Daycare

2005 – 2008

Graduate Teaching Assistant, Binghamton University

2004 – 2005

Graduate National Science Foundation Fellow, Binghamton University

2003 – 2004

Environmental Technician, Waste Resource Associates, Inc.

2001 – 2002

EDUCATION

Binghamton University, Binghamton, New York

- Master of Science, Geology, 2013

University of Pittsburgh, Bradford, Pennsylvania

- Bachelor of Science, Geology and Environmental Science, 2002

CERTIFICATIONS AND TRAINING

Professional Geologist, New York

Architectural, Engineering, and Construction Project Management Bootcamp, PMSJ Resources, Inc.

FERC Environmental Review and Compliance Training
