INDEPENDENCE PARK BOAT RAMP REPLACEMENT

SECTION 6
NOAA ESSENTIAL FISH HABITAT REPORT AND
SECTION 7 MAPPER REPORT

Independence Park Boat Ramp S7 Consultation Areas within 200 ft

Area of Interest (AOI) Information

Area : 7.14 acres

Mar 13 2023 16:22:56 Eastern Daylight Time

The dark black bolded line shows the limits of work within tidal waters and along the shoreline. The transparent rectangle was drawn to identify species in the area and a 200-foot buffer was offset from the general work area. Below are the species mapped within 200 feet of the work area. Note that no species are mapped within the work area itself.

EFH Mapper Report

EFH Data Notice

Essential Fish Habitat (EFH) is defined by textual descriptions contained in the fishery management plans developed by the regional fishery management councils. In most cases mapping data can not fully represent the complexity of the habitats that make up EFH. This report should be used for general interest queries only and should not be interpreted as a definitive evaluation of EFH at this location. A location-specific evaluation of EFH for any official purposes must be performed by a regional expert. Please refer to the following links for the appropriate regional resources.

Query Results

Degrees, Minutes, Seconds: Latitude = 41° 40' 28" N, Longitude = 72° 43' 13" W

Decimal Degrees: Latitude = 41.674, Longitude = -71.280

The query location intersects with spatial data representing EFH and/or HAPCs for the following species/management units.

*** WARNING ***

Please note under "Life Stage(s) Found at Location" the category "ALL" indicates that all life stages of that species share the same map and are designated at the queried location.
