Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

On behalf of the Stone Harbour Condominium Association ("Stone Harbour"), we respectfully write to state a substantive objection to the above application, and to request that this application be submitted to a Coastal Resource Management Council ("CRMC") subcommittee for evidentiary hearing. The Stone Harbour Condominium Association is comprised of the condominium owners of the property located at 341, 343 and 345 Thames Street, Bristol, Rhode Island 02809, and are direct abutters to the proposed expansion located at 267 Thames Street, Bristol, Rhode Island 02809.

We pride ourselves on being good neighbors, adding value to the Town of Bristol, and supporting local businesses. To give some context, the condominium property is comprised of 81 units, situated in 3 buildings, the owners of which contribute to the Town of Bristol as important taxpayers and community members. The Stone Harbour Marina Association is also made up of approximately 40 slip owners (all of whom are condominium owners) who pay additional Bristol taxes assessed on their boat slips.

Condominium owners maintain the property's boardwalk along the shore of Bristol Harbor and the sidewalk on Thames St. As residents, we understand and appreciate the eclectic fabric of downtown Bristol and accept that we live in the midst of a business and entertainment district. However, the Applicant's proposal exceeds far beyond what is safe and acceptable for this area, and therefore, Stone Harbour objects to said application.

To date, our condominium unit owners, as well as our legal counsel, Moses Ryan Ltd., have written letters of concern and spoken at meetings of the Bristol Town Council and Bristol Harbor Commission. Our concerns have focused on noise, safety, view obstructions, access to and from the Stone Harbour Marina and boat navigation, impacts on property values, environmental impacts including water quality, disability access compliance of the pool, town support letters submitted without relevant context, and the proliferation of the pool-boat-use in the Bristol Harbor. The proposed marina expansion and pool installation

has high potential for significant adverse impacts to the coastal environment of the Bristol Harbor, to the private guests it intends to serve, and to the community members of the Town, including Stone Harbour.

First, numerous safety concerns have not been addressed or accounted for by the applicant. The proposal's subject area often experiences rough water and waves, which is a safety concern for the area. Potential detachment of the pool creates a serious risk of injury and property damage. The proposed wave attenuator could impact the Stone Harbour Marina, which is approximately less than 80 feet from the Applicant's marina. The Applicant should be required to show that the wave attenuator will not have a negative impact on surrounding areas and will not shift waves to the adjacent navigation areas or marina. We are also concerned about boats navigating in an area where the pool is proposed to be installed. We are concerned that the approval of this Applicant would have serious negative impacts on the coastal environment and set a precedent so that a proliferation of this use in Bristol Harbor could follow.

Second, open and transparent public and governmental participation is essential to the review process of applications such as this. Letters in the Application file indicate that neighbors were aware of and supportive of this project as early as June 2023. However, CRMC applications for this proposal were pending much earlier than the Applicant was in contact with the Stone Harbour residents. Stone Harbour was not made aware of this Application until May 2024. Stone Harbour has never been supportive of this project. Any claims made to the Town Administrator and relied upon in his letter that neighbors were in full support of the expansion was not accurate. The Applicant's lack of transparency with regard to this project should cause pause.

Many of the above concerns, in addition to other concerns, were raised by both community members and Commission members when this project was reviewed by the Bristol Harbor Commission. Based on the totality these concerns, a conditional advisory recommendation was submitted to the Bristol Town Council, recommending conditions for this project including a written plan for treatment of pool water with no discharge into the harbor; a written storm action plan with specific contractors to pump out pool water and a specific facility to haul the pool boat out of the water; an engineer's certification that access to the pool boat will be ADA compliant; and that additional barriers are installed to prevent collisions between vessels and the pool boat. These are all important conditions that should be fully addressed before this Application can be considered. Leaving important conditions to be addressed in the future rather than completely addressing them now creates the opportunity for abutters and neighbors to again be left out of the process.

This application is an example of the unjustified and unjustifiable. The claimed "need" of a private, small (yet outspoken) desire neglects and diminishes the rights and

interests of the general public. This proposal will tarnish the coastal features that make the Town of Bristol a historic and renowned place. The proposed expansion, in our opinion, fails to enhance the coastal environment, and discounts the countless negative impacts described above. Furthermore, we respectfully request that the matter be referred to a subcommittee for a full hearing on the matter of TSL, LLC's proposed marina expansion and pool boat installation, and that this proposal be denied.

Respectfully,

A handwritten signature in black ink, appearing to read "Howard G. Sutton", written in a cursive style.

Howard G. Sutton

Wakefield, RI 02879

Dear CRMC Members,

**Subject: Communication of Concerns and Mixed Opinions on Joint Public Notice  
CRMC/DEM re Thames Street Landing, TSL, LLC, 267 Thames Street**

On behalf of the Bristol Town Council, I am writing to inform you about the diverse opinions and concerns within our council and community regarding the proposed Joint Public Notice CRMC/DEM re Thames Street Landing, TSL, LLC, 267 Thames Street.

During our recent Town Council meeting of July 31, 2024, a motion was passed to submit the recommendations made by the Bristol Harbor Commission, along with a copy of the Harbor Commission meeting minutes and the draft council meeting minutes of July 31, 2024, to reflect the various concerns addressed by members of the council and residents. The motion, made by Teixeira/Sweeney, was passed with the following votes:

- In favor: Chairman Calouro, Councilmen Teixeira, Sweeney, and Ley.
- Opposed: Vice Chairwoman Parella.

The council discussed the importance of effectively communicating to CRMC that there are diverse opinions within the council and the community regarding the project.

It was recommended that a cover letter, along with the council draft minutes, be provided to CRMC. This will clarify that the recommendations by the Harbor Commission do not specifically express the town or council's unanimous support or opposition.

Please find attached the following documents for your review:

1. Exhibit A- Recommendations made by the Bristol Harbor Commission.
2. Exhibit B- Minutes from the Harbor Commission meeting of July 1, 2024.
3. Exhibit C- Draft minutes from the Town Council meeting of July 31, 2024.

We believe it is important for CRMC to fully understand the range of opinions and concerns that exist within our community regarding this project. We trust that this information will be taken into consideration during your deliberations.

Thank you for your attention to this matter. Should you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Melissa Cordeiro', written in a cursive style.

Melissa Cordeiro  
Council Clerk

## TOWN OF BRISTOL, RHODE ISLAND

### BRISTOL HARBOR COMMISSION

**To:** The Honorable Bristol Town Council  
Via the Town Clerk

**CC:** Town Administrator  
Harbormaster

**DATE:** July 1, 2024

**RE:** Advisory Recommendation re CRMC – Application File # 2023-08-084, by TSL, LLC for installation of a berthing facility and expansion of existing marina for the mooring of a pool boat for recreational purposes.

At its meeting of July 1, 2024, the Harbor Commission, together with the Harbor Commission Advisory Committee, heard two hours of public testimony, and following discussion, voted by a vote of 4 to 1, to send the following recommendation to the Town Council:

The Bristol Harbor Commission respectfully recommends to the Bristol Town Council that this Application meets the criteria of the Bristol Harbor Management Plan, in that it is completely within the riparian rights area of the applicant, does not cross the Harbor Line, and does not interfere with navigation in Bristol Harbor. The Harbor Commission is concerned with potential water pollution from the treated pool water, danger to nearby riparian and littoral structures in the event of a hurricane, public access to the waterfront by physically handicapped individuals, and possible danger to pool users in the event a large vessel navigating nearby might lose power or control and collide with the pool boat. Consequently, the Harbor Commission recommends to the Town Council that the following four conditions be recommended by the Town Council to the RI CRMC prior to CRMC's consideration of the Application.

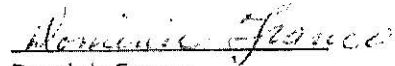

1. The Applicant shall provide a written plan indicating how the pool water will be treated, how the waste from any backwashing filtration system will be disposed, and confirming that there will be no discharge of such filtration system water into Bristol Harbor.

Planning Board Meeting February 09, 2023

2. The Applicant shall provide a written Storm Action Plan indicating the actions proposed for certain time frames (such as when a Tropical Storm or Hurricane Watch is issued and when a Tropical Storm or Hurricane Warning is issued) and identifying the specific contractors who will provide trucks to pump out the pool water and identifying the specific marine facility that will haul the pool boat out of the water.
3. The Applicant shall provide certification from an engineer that the access to the pool boat from the shore will meet ADA requirements.
4. The CRMC should consider requiring the Applicant to install additional barriers, which might include additional pilings, to prevent any out of control vessel from colliding with the pool boat and endangering pool users.

Respectfully submitted,

Dominic Franco

Chair, Bristol Harbor Commission

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

## H. Old Business

H1. Joint Public Notice CRMC/DEM re Thames Street Landing, TSL, LLC, 267 Thames Street **(continued from May 29th)**  
**Public comment extended to August 15, 2024**

- a. Recommendation - Bristol Harbor Commission
- b. Alyce Wright, Lila Delman, re letter of concern
- c. Howard Sutton, President Stone Harbour HOA re letter of opposition
- d. Documents submitted to the Harbor Commission Meeting, July 1, 2024
- e. Mark T. Ryan, Moses Ryan LTD, re letter of concern

Teixeira/Sweeney- motioned to submit to CRMC the concerns and recommendations made by the Bristol Harbor Commission, along with a copy of the Harbor Commission meeting minutes and this evening's draft meeting minutes, to reflect the various concerns addressed by members of the council and residents. Voting in favor were Calouro, Teixeira, Sweeney, Ley. Voting Opposed was Vice Chairwoman Parella.

Prior to the vote being taken, Chairman Calouro stated that a recommendation had been received from the Harbor Commission and proceeded to read their four recommendations as follows:

1. The applicant shall provide a written plan indicating how the pool water will be treated, how the waste from any backwashing filtration will be disposed, and confirm that there will be no discharge of such filtration system water into Bristol Harbor.
2. The applicant shall provide a written storm action plan indicating the actions proposed for certain time frames (such as when a tropical storm or hurricane watch is secured and when a tropical storm or hurricane warning is issued) and identifying

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

- the specific contractors who will provide trucks to pump out the pool water and identifying the specific marine facility that will hull the pool boat out of the water.
3. The applicant shall provide certification from an engineer that the access to the pool boat from the shore will meet ADA requirements.
  4. The CRMC should consider requiring the applicant to install additional barriers which might include additional pilings, to prevent any out-of-control vessel from colliding with the pool boat and endangering poll users.

Councilman Teixeira motioned to submit the Harbor Commission recommendations to CRMC, seconded by Sweeney for discussion. It was clarified that while the recommendation could be submitted to CRMC, the approval was under CRMC's jurisdiction.

Vice Chairwoman Parella noted that the recommendations by the Harbor Commission were well thought out. However, she personally believed the pool boat would be a public nuisance and the town would regret it. She felt there was no need for the pool in that congested location and thought the council should oppose the application. She clarified that a "no" vote from her would reflect her opposition to the pool boat, not disagreement with the Harbor Commission's recommendations.

Councilman Ley Councilman Ley expressed his opposition to the application as well. Councilman Teixeira stated that submitting the Harbor Commission's recommendations to CRMC did not imply his support for the application, as it fell under CRMC's jurisdiction.

Seth Hardy, the applicant's attorney representing TSL, LLC Thames Street Landing, summarized the request. Applicant Larry Goldstein and engineer Ron Blanchard were also in attendance. Attorney Hardy explained that the proposed project involved a vessel adjacent to the Bristol Harbor Inn, 8 feet wide, 20 feet long, and 4 feet deep, for seasonal use only and secured when not in use. He noted that the pool boat is allowed by right in Bristol Harbor and the zoning district. Attorney Hardy emphasized the benefits to the town and the alignment with the 2016 Comprehensive Plan for Economic Development.

Attorney Hardy addressed the recommendations and opposition, stating that TSL intended to present a storm action plan and pool water filtration plan to CRMC. He argued that ADA compliance and additional pilings were not warranted, citing CRMC standards for small marinas. He also responded to opposition from Stone Harbor, noting that the pool boat did not

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

violate town ordinances 8-45 and 8-54 prohibiting swimming in navigational areas and blocking public access to water.

Attorney Hardy addressed additional objections and concerns raised. He stated that guests at the Bristol Harbor Inn were surveyed and strongly indicated that a pool was a missing amenity. He noted that guests seeking hotels with pools could choose other locations, potentially impacting the local economy.

In response to suggestions for alternate locations, Attorney Hardy explained that none were available. The current deck area is used for weddings, and the surrounding land is capped due to environmental concerns.

Regarding safety concerns, Attorney Hardy reassured that no alcohol would be allowed at the pool, and there would be security cameras and locks in place. To address noise concerns, he stated there would be no diving or audible music, emphasizing that noise is regulated by town ordinances, not CRMC.

On environmental issues, Attorney Hardy acknowledged concerns about pile driving disturbing the environment. He noted that the Department of Environmental Management (DEM) would participate, and a permit from the Army Corps of Engineers, which had already considered the pile driving, would be submitted to CRMC. CRMC would have regulatory jurisdiction over the application.

He continued to argue that this project falls under CRMC jurisdiction and addressed the request made by Stone Harbor for the council to provide a negative recommendation. Attorney Hardy noted that this request was contrary to the Town Administrator's position, which supported the application. He requested council consideration to also provide a recommendation for CRMC's approval of the proposal.

Vice Chairwoman Parella asked for the summer occupancy rate and average length of stay. Larry Goldstein replied that he did not have that information at that time. Vice Chairwoman Parella then asked if Mr. Goldstein had been recently seeking to expand the hotel due to high demand, suggesting that the argument for needing a pool to attract guests seemed inconsistent with the expansion plans. She pointed out that there are three local beaches near the hotel, offering plenty to do for short-term guests, and questioned whether a pool would significantly attract more visitors.

Vice Chairwoman Parella noted that this proposal might set an unwelcome precedent in the area. She expressed uncertainty

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

about whether the council has ever provided recommendations to CRMC, noting that most CRMC applications involve docks or dock extensions, not pool boats. She emphasized the neighborhood's density and potential nuisance issues, asserting that this proposal could be problematic regardless of safety protocols and doubting its impact on tourism or hotel occupancy.

Mr. Goldstein responded that the hotel is not always fully booked and expressed a desire to fill the gaps. He mentioned that families often look for hotels with pools and emphasized that the pool boat idea was a creative solution inspired by a similar concept in Maine. The aim was to provide an amenity that families are seeking without causing a nuisance or headache for guests.

Parella acknowledged that surveys might indicate a desire for certain amenities, but based on her experience, a lack of specific amenities would not necessarily deter guests from revisiting a hotel. She expressed skepticism about the pool's potential to significantly impact the hotel's success and suggested that the hotel could be better marketed by highlighting local family amenities.

Attorney Hardy stated he would follow up with the hotel occupancy rate and average length of stay.

Councilman Ley asked Mr. Goldstein if there would be any restroom facilities and how far away they would be, as well as the protocol for access. Mr. Goldstein responded that guests could use either the guest rooms or the two bathrooms located in the hotel lobby, which are always open until sunset. Councilman Ley also inquired about the potential for the pool boat to rust and the maintenance protocols, expressing concern over unclear photos and the assurance of proper upkeep. Mr. Goldstein provided larger, clearer formatted proposals of the pool boat and assured the council that the establishment has always maintained its facilities with updates and maintenance, and they would treat the pool boat the same way, just like the common areas and the tent. He emphasized that they were not looking to create an eyesore at their hotel and that the boat was modeled as a first-class design.

Councilman Ley then questioned Attorney Hardy's statement regarding ADA requirements, asking if CRMC had the authority to impose ADA accessibility and if the town would be responsible for that. He asked the town solicitor for clarity. Solicitor Ursillo stated that he was not aware of CRMC's specific authority to impose or require ADA requirements. He mentioned

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

that if this was a recommendation from the Harbor Commission, it could be something the town could address if approved by CRMC, and the applicant could then address ADA compliance.

Councilman Ley stated that ADA compliance should probably have the regulatory framework addressed before they go before CRMC, and the council might want to have requirements for ADA accessibility. Project Engineer Blanchard explained that according to CRMC regulations, a marina with fewer than 25 boats is considered a small marina and does not require ADA compliance. A discussion ensued regarding ADA compliance and who had jurisdictional authority to impose it. Ley talked about the potential for other organizations requesting a pool boat and whether the town would have the authority to impose ADA compliance, expressing the need to understand this before making any decision.

Councilman Sweeney asked for clarification on how the pool water would be handled, as addressed by the Harbor Commission. It was noted that the filtration plan would be similar to the system used by the Yachtsman in Maine, which the applicants intended to implement for this pool boat.

Howard Sutton, president of the Stone Harbor Homeowners Association, then spoke. He discussed a letter provided to the council from Alyce Wright, a professional realtor from Lila Delman, which included an affidavit expressing concerns about the proposed marina pool boat's impact on neighboring property values. He further read the letter he submitted to the council for the record as follows:

*"We respectfully request that the Bristol Town Council, after due diligence, concerns raised by abutting property owners, and issues expressed by the Bristol Harbor Commission withdraw the letter of support for the TSL's application for the installation of a pool boat to CRMC that was sent by the Town Administrator.*

*It appears that the letter Mr. Contente sent to CRMC on June 6, 2023, was based on erroneous information and unsupported assumptions provided by TSL. The majority of TSL's points are fiction, not fact.*

*In addition, in the requested revised correspondence to CRMC, we support the inclusion of the four recommendations of the Bristol Harbor Commission ( see attached request issued on July 1, 2024) along with compliance with the State of Rhode Island Department of Health requirements for swimming pools and*

RECEIVED

AUG 13 2024

COASTAL RESOURCES  
MANAGEMENT COUNCIL

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

*an environmental impact study by the RI Department of Environmental Management.*

*In evaluating this proposal by TSL, it should be evident that the concerns raised by tax-paying residents and the Harbor Commission supersede a dubious, nominal increase in revenues for a private company.*

*The Bristol Town Council usually receives and files CRMC documents without comment. One would question why this application, fraught with obvious potential problems, should be an outlier”*

Mr. Sutton spoke on his own comments and stated that in over four decades working with one of the most respected newspapers in the country, he learned the importance of distinguishing fact from opinion, fiction, and unsupported assumptions. He criticized the letter from the town administrator to the CRMC, based on TSL information, as being fictional and unsupported. He found it curious that a response regarding property value impacts was received within a week, yet when asked about the hotel occupancy rate—under study for two years—there was no available information. He found it hard to believe they could not provide the occupancy rate.

Attorney Mark Ryan, representing Stone Harbor, then addressed the council, noting several issues. He pointed out that while the council stated they don't normally take a position on CRMC matters, the town had already done so through the town administrator's favorable letter, which might have been based on misleading facts. Attorney Ryan pointed out that the Harbor Commission had made four additional recommendations. He argued that remaining silent effectively promotes the hotel boat.

He suggested that calling the pool boat a vessel was a workaround to avoid going through zoning for a deck. Attorney Ryan believed that CRMC cared about the town's stance and opinion on the matter, regardless of jurisdiction, and encouraged the council not to hesitate in expressing opposition. He expressed concern over the hotel's non-compliance with ADA requirements, questioning whether the Disability Rights of Rhode Island and the Governor's Commission on Disabilities would agree that the pool boat, considered a vessel, did not require ADA compliance, or if it would be seen as a place of public accommodation requiring ADA compliance under Title III. Ryan questioned that if neither CRMC nor the town raised the question of ADA compliance, who would.

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

Discussions ensued about ADA compliance protocols. Attorney Ryan pointed out that when the applicant petitioned the zoning board for a dimensional variance to construct additional rooms, the minutes reflected a high demand for the hotel.

Attorney Ryan alleged that when the applicant approached the town administrator claiming the need for a pool to fill occupancy, it contradicted their hardship claim before the zoning board, where they sought assistance due to being swamped with demand. He argued that both statements couldn't be true. Additionally, he contended that if the hotel is swamped in the summer and the pool is needed only during that season, it raises questions about its use in the off-season.

In addition, Attorney Ryan highlighted that the town administrator had already sent a positive letter supporting the pool boat proposal, relying on the information that it would benefit the town. However, he argued the validity of this information. He discussed the possibility of alternate locations for the pool and expressed concerns about the appropriateness of the proposed site.

Attorney Ryan requested that the letter sent by the town administrator not be considered the official stance of the town. He urged the council to not only forward the recommendations made by the Harbor Commission but also to include the council's opposition to the application.

Administrator Contente stated that in June of 2023, after meeting with the hotel owner and being provided with a significant amount of information and detail, he wrote a letter of support for the pool boat proposal. He noted for the record that he writes many letters on behalf of individual businesses that may have an economic impact, and collectively, these businesses do make a difference. Contente highlighted that Bristol Harbor Inn is an employer whose guests frequent local businesses, and a pool is a sought-after amenity.

Town Administrator Contente expressed his disagreement with the opposition, maintaining his opinion that the pool would benefit the town. Town Administrator Contente acknowledged that while he had met with Mr. Sutton over various issues over the years, he did not reach out to Mr. Sutton after his initial concerns with the letter. He expressed disappointment that Mr. Sutton did not reach out to discuss the matter, as he had done in the past.

Town Administrator Contente emphasized that he typically stands by his opinions. However, he respects the council members, and

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

if his letter was contrary to the council's intentions, he would withdraw it. Town Administrator Contente reiterated his belief that the pool would benefit the town and families and stated he is a strong proponent of public waterways.

Town Administrator Contente affirmed that the hotel is well-run with no major issues and found the project fascinating. He mentioned being informed that neighbors had been and would be notified in 2023, and he hoped his integrity and honesty were not being questioned. He viewed the pool boat as a positive addition to creating a family-friendly atmosphere and stated that was his opinion as an elected official.

Mr. Sutton clarified that no one was questioning the administrator's hard work and accomplishments. However, he stated that the administrator was misled to believe that the neighbors were notified and supportive. In reality, the information received was inaccurate. Stone Harbor was not notified until two years later and believes that the pool boat is a poor idea. Mr. Sutton also raised concerns about noise complaints at the hotel, suggesting that these issues would worsen if the pool boat were added.

Councilman Teixeira stated that the administrator is an elected official and has the right to hold and express his own opinions. He emphasized that they work together, and it is not uncommon for the administrator to send out his own letters of support. Councilman Teixeira affirmed that it was within the administrator's rights to do so and that he would not weigh in on the administrator's decision.

Chairman Calouro agreed that the council does not direct the administrator and affirmed that they have a great working relationship. He emphasized that the council relies on the boards and commissions for specialized information, as the council may not be familiar with every rule and regulation. The council looks to these boards and department heads for guidance.

Chairman Calouro expressed his appreciation for the information provided by the Harbor Commission and stated that he is not interested in revising their recommendations. He mentioned that if the Coastal Resources Management Council (CRMC) requires ADA compliance, they will ensure it is weighed in appropriately. Chairman Calouro believes it is important to move forward with the process and that every applicant should have the opportunity

TOWN COUNCIL MEETING MINUTES-WEDNESDAY, JULY 31, 2024

to proceed. He stated that he does not want to send a letter of support or objection at this time.

Vice Chairwoman Parella stated that while some members of the council may not want to take a position, the town is already on record supporting the project through a letter and an affidavit. The issue is not about whether the administrator can send a letter, but rather about the town's official stance. She acknowledged that not all council members may share the same level of enthusiasm for the project.

Vice Chairwoman Parella believes that CRMC should be made aware that the council does not fully support the project. If CRMC proceeds, they should be informed of the council's concerns. She cautioned that remaining silent could be interpreted as the town's overall support for the project. Vice Chairwoman Parella indicated that she would be voting in opposition to the project and believes a letter should be sent to raise concerns beyond the recommendations of the Harbor Commission.

Councilman Ley stated that there is a diversity of opinions among the council members, with some having grave concerns about the project. He is worried that remaining silent would signal to the agency that the town may be supportive of the project.

Discussions ensued on how to effectively communicate to CRMC that there are mixed opinions and not everyone is enthusiastic about the project. It was recommended that a cover letter, along with the council draft minutes, be provided to CRMC. This would clarify that the recommendations by the Harbor Commission do not specifically express the town or council's support. Additionally, it would ensure that CRMC is aware of the concerns raised by the council and members of the public. It was also suggested to forward the minutes from the Harbor Commission Meeting.

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

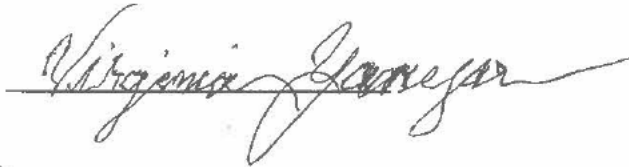

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As someone who lives in the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File [2023-08-084](#); RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol and Member of the Bristol Harbor Board Advisory Commission, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. As proposed this installation is temporary in nature which would indicate that it can only be in place for a period of 30 days according to the CRMC Red Book Regulations, however the installation will also require the addition of several pilings which will definitely impede safe traffic circulation in a very confined area. Foremost of our concerns it will prove quite difficult to ensure public safety as well as to maintain the aesthetic qualities of the waterfront with this in barge place.

The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

---

George S. Burman, Member Bristol Harbor Board Advisory Commission.

RE: TSL, LLC Proposed Installation of a Berthing Facility and Expansion  
of Marina for Mooring of a Pool Boat –  
CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008  
(MPL Only)

Dear Members of the CRMC:

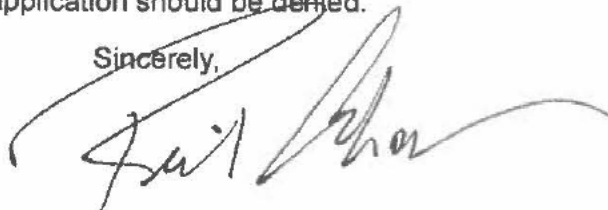

I object to the above application presently pending before the CRMC. As a resident of the Town of Bristol for approximately forty-five (45) years, I join the overwhelming number of Bristol residents, the Bristol Harbor Commission and the Bristol Town Council requesting that this application be denied.

I oppose the marina expansion and the "pool boat" installation on legal, environmental, safety, social and economic grounds. The application is defective in its failure to develop a comprehensive management plan for the proposed use; for its failure to improve the coastline, and its failure to deal with environmental concerns; for its failure to satisfy CRMC application requirements and regulations; for its failure to satisfactorily address safety issues; for its failure to pay sufficient attention to its impact on recreational and commercial users of the waterfront; for its failure to pay sufficient attention to the impact that approval of this application would have on property owners; and approval of this application would create a precedent allowing and expanding other untested and unregulated uses of the Bristol waterfront.

Finally, as a practical matter, if the applicant is interested in providing swimming and other waterfront activities for their hotel guests, the Bristol Town Beach is less than a mile from their hotel, as well as beautiful nearby rights of way to the Bristol waterfront. Those facilities remain available to the applicant's hotel guests.

For the reasons stated, the application should be denied.

Sincerely,

Richard I. Abrams

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Bonnie Berretto

(MPI. Only)

Dear Members of the Coastal Resource Management Council,

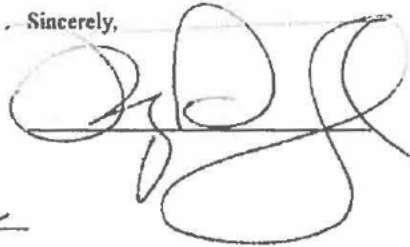

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

---

Dear Members of the Coastal Resource Management Council,

---

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident and business owner here in the Town of Bristol, I am concerned about this improper proposed use. I believe that recreational pools should be confined to an appropriate fixed place on land, where there would be minimal danger and disruption to harbor waters. I view this proposed floating pool to be unsafe and unacceptable for the Town of Bristol and the waters of our State. It would be a rowdy distraction to say the least and impact the tranquil environment of the harbor as it now exists.

---

There have been very positive public and private developments to precious Bristol harbor over the years and a floating pool would be a detriment to these qualitative improvements.

---

Installation of this pool would negatively impact the coastal environment, and I believe would diminish property values in the surrounding area. I am concerned that CRMC's approval of this application might lead to other proposals of this nature. Approval of this floating pool may lead to others being installed throughout Bristol Harbor at other docks and marinas. This would create many safety risks and negatively alter the Harbor which is for ALL people.

---

To my knowledge, the applicant has not adequately addressed or accounted for numerous safety and logistical factors. The application will not enhance the coastal environment and does not meet CRMC's regulations, application requirements, or prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

---

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it. As an abutting business owner at 30 Bradford Street, I strongly request the denial of this application.

---

Sincerely,

---

Stephan Brigidi, Managing Partner

RE: CRMC File No.: 2023-08-084

To the Members of the CRMC:

My name is Aaron Ley and I am one of five at-large representatives on the Bristol Town Council writing in my individual capacity as a town councilman and a resident of the Town of Bristol. I am writing in opposition to the so-called "pool boat" located at Thames Street Landing. I hope to raise some of the concerns I made during our July 31 town council meeting.

My most immediate concerns are the following:

- Our town does not have a comprehensive framework in place for regulating the use of floating pools in waters under our jurisdiction. The concept of a pool boat has not been thoroughly contemplated in our town, which means that we do not yet have rules in place for the safe and healthy operation of pool facilities, and accessibility rules.
- Without a comprehensive framework in place, the risk of health and safety concerns grow in severity when it is taken into consideration that the approval of a pool boat facility on our waters may encourage hotel competitors (e.g., short-term rental units) and clubs (e.g., Bristol Elks Club) to also seek permission for the construction of pool facilities in our waters.
- Though it has been requested that applicants develop a Storm Action Plan so that pool water will be withdrawn from the facility by contractors during a severe weather event, there is no way of ensuring that contractors will have the capacity to fulfill these obligations across the state during a time of intense and/or sudden emergency.

In addition to these concerns, it is my hope that the CRMC will also weigh the concerns that are presented by the Stone Harbour Condominium Association in the Moses Ryan letter memo written on May 29, 2024.

Thank you for the opportunity to comment on this permit application.

Sincerely,

**Aaron Ley**

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As someone who lives in the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Kathleen DeVester

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Christine Aversward

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident and business owner here in the Town of Bristol, I am concerned about this improper proposed use. I believe that recreational pools should be confined to an appropriate fixed place on land, where there would be minimal danger and disruption to harbor waters. I view this proposed floating pool to be unsafe and unacceptable for the Town of Bristol and the waters of our State. It would be a rowdy distraction to say the least and impact the tranquil environment of the harbor as it now exists.

There have been very positive public and private developments to precious Bristol harbor over the years and a floating pool would be a detriment to these qualitative improvements.

Installation of this pool would negatively impact the coastal environment, and I believe would diminish property values in the surrounding area. I am concerned that CRMC's approval of this application might lead to other proposals of this nature. Approval of this floating pool may lead to others being installed throughout Bristol Harbor at other docks and marinas. This would create many safety risks and negatively alter the Harbor which is for ALL people.

To my knowledge, the applicant has not adequately addressed or accounted for numerous safety and logistical factors. The application will not enhance the coastal environment and does not meet CRMC's regulations, application requirements, or prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it. As an abutting business owner at 30 Bradford Street, I strongly request the denial of this application.

Sincerely,

Stephan Brigidi, Managing Partner

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

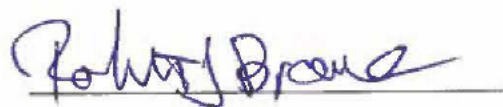

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Printed Name:

Michael Wright

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring  
of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008  
(MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As someone who lives in the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Printed Name:

Kimberly G.P. Sutton

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As someone who lives in the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use of a so-called "pool boat," which does not appear to be described or anticipated by the CRMC Regulations or the Rhode Island General Laws.<sup>1</sup> The applicant's proposal is neither safe nor acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am also concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools could be installed throughout Bristol Harbor at any dock and marina, which would create many safety risks and negatively alter the Harbor. Moreover, since there is no "pool boat" provided for by regulations or statute, permitting this use would set a precedent for other ocean-side communities and residents who would like to have a "pool boat."

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. In my opinion, having attended three hearings on this matter, the applicant has provided insufficient information and/or misinformation concerning its proposal, and has failed to answer many of the questions asked at the local level. Furthermore, the applicant has presented only a "prototype" of the proposed "pool boat," and has not identified a manufacturer or any specifications for the actual proposed pool. The applicant has failed to make

---

<sup>1</sup> While I offer comment only as a resident of Bristol, I have been a Rhode Island attorney since 1982, and am familiar with state and municipal law.

provisions for protecting users and the Harbor from the winds that frequent the location, including from the potential of plastics or other harmful materials being blown into the Harbor and bay.

In sum, the application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa Dinerman", is written over a solid black horizontal line.

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

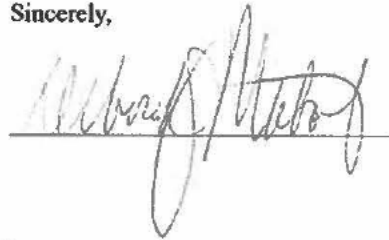

I write to object to the above application pending before the Coastal Resource Management Council ("CRMC"). As a resident of the Town of Bristol, I am concerned about this proposed use. The applicant's proposal is not safe or acceptable for the Town of Bristol and the waters of our State.

Installation of this pool would negatively impact the coastal environment and could diminish property values in the surrounding area. I am concerned that CRMC's approval of this application would lead to a proliferation of this use in Bristol. Pools would be installed throughout Bristol Harbor at every dock and marina, which would create many safety risks and negatively alter the Harbor.

As to this specific application, the applicant has not addressed or accounted for numerous safety and logistical factors. The application fails to enhance the coastal environment and does not meet CRMC's regulations, application requirements, and prerequisites. Bristol's residents have overwhelmingly opposed this application at every level, including at the Bristol Harbor Commission and the Bristol Town Council.

I strongly oppose TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge CRMC to deny it.

Sincerely,

Re: TSL, LLC Proposed Installation of a Berthing Facility and Expansion of Marina for Mooring of a Pool Boat - CRMC File 2023-08-084; RIDEM Water Quality Certificate Number 24-008 (MPL Only)

Dear Members of the Coastal Resource Management Council,

As year round resident of Bristol I'm writing to strongly object to the above application pending before the Coastal Resource Management Council ("CRMC").

Others (the Stone Harbour Condominium Association, the Bristol Harbor Commission and the Bristol Town Council) have raised specific concerns and objections. I fully share in those concerns and objections and will not reiterate them here.

However, I would like to raise details that I have not heard voiced to add to your deliberations. I live in the South Building of the Stone Harbour condominiums overlooking the proposed site of the pool boat. During the summer, frequent strong afternoon SW winds cause wave action that often makes it difficult for boaters to get on and off their vessels. For the safety and comfort of pool users and to avoid ingress of ocean water and/or spillage of pool water into the harbor a wave attenuator has been proposed. I ask you to please evaluate carefully and scrutinize its design to assure that:

1. deflected wave energy will not have a negative impact on their marina (and ours at Stone Harbour) impacting the safety of boaters and/or make marina damage more likely at times of unusually high wind and waves.

- 2 the analysis provided of the protection to prevent spillage of pool water into the harbor is fully delineated and rigorous. Some mention has been made of the relatively low free board of the pool boat but there is no mention of the distance between the level of the pool water and the pool deck. I suspect that this measurement will be less than the freeboard of the vessel. My concern is that when the timing of the wave action is such that it interacts with the natural frequency of the pool boat and its contained water to increase the amplitude of the sloshing, the pool water will spill out onto the pool deck and then into the harbor. I believe that this distance is critically important in evaluating the likelihood of pool water egress and therefore the adequacy of the wave attenuator design in protecting the harbor.

3. the proposed action plan (if necessary) under conditions of a small craft advisory, a gale warning or a more severe weather alert is realistic. I've only heard mention of the need for such a plan under a hurricane watch or warning.

I respectfully ask you to add the above concerns to your deliberations.

And given a number of previous misleading, contradictory and erroneous statements and opinions that are contained in communications by others to your body I'd like to add a personal note to address one. I am a Bristol Town resident who is directly impacted by the probable erosion of property values due to the proposed pool boat sitting directly in front of my condominium unit. I find the notion that the citizens of Bristol and the state of Rhode Island will greatly benefit from the restricted use of this pool boat to guests of the Bristol Harbor Inn to be far-fetched. Charitably, it may do so but only in a small and indirect manner. Any possible such benefit must certainly be tempered by the negative consequences (both probable and potential) that will result should the project proceed. I ask that you not allow such questionable statements and opinions to color your analysis of the issues.

I'm adding my name to those opposing TSL, LLC's proposed marina expansion and pool boat installation and respectfully urge the CRMC to deny it.

Sincerely,

Eric J. Kawaoka, MD

**Subject:** Pool boat proposal for Bristol Harbor  
**Attachments:** pool boat site - Bristol harbor.jpeg

Dear CRMC Staff,

As a longtime resident of Bristol RI. I have previously emailed to you a letter previously opposing the proposal by the Bristol harbor Inn to locate a floating barge in the harbor that they referred to as a " pool boat".

In order to better comprehend the multiple objections to this unsightly and unsuitable proposal I have attached for your reference a copy of the proposed location of this installation photographed at low tide on Monday of this week.

In addition to the many other objections concerning poor accessibility, potential harbor pollution, lack of available sanitation and risky safety, this is hardly an attractive location for tourist bathing surrounded by the nether regions of the Harbor pilings and nasty odorific underside of the adjacent structures at low tide twice a day.

As this installation is by its very nature temporary and will be removed after each season, I urge you as CRMC to reject this proposal on behalf of the general public as not conforming with the rules and regulations governing temporary harbor structures included in the CRMC RED Book .

Yours Truly,  
George Burman, Architect Emeritus, Bristol RI.
