

Dear Chairman Coia,

I'm writing in support of SouthCoast Wind Energy, LLC's Class B Assent Application, Document #SC01-COR-PRT-RPT-0009.

Offshore wind projects like SouthCoast are a huge benefit to our coastal waters. They provide clean, reliable energy while reducing or eliminating the impacts to human health and safety, wildlife habitat, fisheries, recreation, and viewshed caused by fossil fuel use. This cabling will allow SouthCoast to connect its wind turbines to the power grid through a brownfield site previously occupied by a coal plant - an upggrade that will deliver the energy we need without the pollution we suffered in the past.

I urge you to approve this permit.

Raymond C. Coia, Chair  
CRMC  
4808 Tower Hill Road, Suite 3  
Wakefield, RI 02879-1900
